DETAILED ACTION

Allowable Subject Matter

1. Claims 5, 6, 10-15, 21-26, 28, 30 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record, neither anticipates nor renders obvious the following limitations as claimed:

a) As for claim 5, 10 and 21 the prior art of record does not teach or fairly suggests test imaging time and the charge storage time at the actual imaging time are different from each other and the dark output level at the actual imaging time is derived by multiplying the imaging device output level X obtained by said test imaging means by a ratio Y/Z of the test imaging time Y of said test imaging means to the charge storage time Z for exposure control at the actual imaging time in combination with other claimed elements.

b) As for claim 12, 23 the prior art of record does not teach or fairly suggests a value of the effective gain set by said dark output correction means is determined based on a resultant value obtained by dividing "a value corresponding to the saturation level on the output side of said dark output correction means" by a difference between "a value corresponding to the saturation level on the input side of said dark output correction means" and "the maximum value of the dark output level detected by said dark output level detecting means" in combination with other claimed elements.

c) As for claims 28 and 30 the prior art of record does not teach or fairly suggests an imaging apparatus comprising setting an effective gain for the corrected imaging signal

according to the set clip level; and controlling exposure of the imaging device according to the set gain in combination with other claimed elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
